NNAO relative-energy benchmark | fixed epoch 629
Top: deviation from finite-basis HF/cc-pVTZ | Bottom: total error against GMTKN55 v2 references
Reaction / isomerization energies (6/6 complete)
Barrier heights (6/6 complete)
Noncovalent binding energies (6/6 complete)

MAE (kcal/mol)
Selected 18-reaction panel; all methods DF-RHF. NCI energies have no counterpoise correction.
GMTKN55 error includes HF method error; this is not a full GMTKN55 or CBS assessment.
